

MOISTURE METER

(IMPORTED FROM GANN, GERMANY)

CATALOGUE NO.: GEC-P40116-B

GANN Moisture Meter is an electrical resistance type digital moisture meter. It calculates on the basis of mass of water/ mass of solids. Since the electrical conductivity of paper is considerably effected not only by its moisture content, but also by the paper temperature and various substances contained in the paper, GANN Moisture meter has been designed to take these parameters into consideration to ensure accurate readings.

The hands close naturally around the ergonomic form of the housing so that the pins on the end of instrument can be pressed into the material to be measured. The thin pins make it easy to measure the moisture content of materials upto a maximum thickness of 25 mm.

Salient Features:

- Handy quick pocket sized moisture meter for speedy single or series measurements.
- Completely automatic instrument setting.
- No separate electrodes or lead required.
- Measurement of moisture content with a digital readout in % of dry weight.
- Provided with spare pins and protective cap.
- Suitable also to measure wood, normal gypsum & mixed plaster.

TECHNICAL – SPECIFICATION

Moisture Range :	5 to 20%
Power Supply :	9V dry cell or chargeable battery.
